

NEW Husqvarna Diamond Chains and Bars

NEW ELITE-GUIDE BAR FOR GREATER CUTTING DEPTH

With the launch of the new Husqvarna new Elite-Guide bar, we focus on cutting depth instead of guide bar length. The new guide bar provides a cutting depth of 450 mm which is 15 mm deeper than the previously longest guide bar in our range. It also provides improved durability, better water supply and longer service life.

NEW DIAMOND CHAINS DEVELOPED FOR MAXIMUM PERFORMANCE

We're introducing a new chain concept, built on a stronger chain chassis and a new diamond segment design for increased efficiency. The new Husqvarna diamond chains provide higher overall performance, so you can expect both greater cutting depth and longer chain life. The new range includes both Gold and Silver level chains to suit a wide variety of applications.

Which fits what:

- ✓ Husqvarna guide bar and chain fits ICS chain power cutters.
- ✓ ICS guide bar and chain fits Husqvarna Chain power cutters.
- ✗ Husqvarna Chain does not fit today's 16" guide bar (ICS F4*) - risk of wearing the rim sprocket out.
- ✗ PRO 45 Chain (ICS F4*) does not fit Husqvarna 18" guide bar - risk of wearing the rim out before the chain.

NEW Husqvarna Diamond Chains and Bars

Husqvarna new diamond chains and bars are not interchangeable with previous models of bars and chains. When ordering a new chain or a new bar you will also need to order both the new bar and chain plus depending on the chainsaw model and age a spline-way and clutch drum may also need to be purchased.
